

BEECH CREEK BRANCH LINE

Comment Form for Public Scoping Meeting
February 10, 2009

Thank you for joining us tonight to learn about environmental studies for the proposed reactivation of the Beech Creek Branch Line. An important component of the environmental clearance process is to gather and consider comments from the interested public. Please complete the information below and deposit this form in one of the collection boxes marked "Comment Forms".

1. In which municipality and county is your residence located?

SNOW SHOE TOWNSHIP

2. How did you learn about the meeting tonight?

Received letter in the Mail - several e-mails, saw the advertisement on
channel 6

3. Please tell us your comments about the information presented here tonight. (How well was the information presented; was it informative and understandable; were the consultants helpful in answering your questions; etc.)

It would be a folly to believe that one meeting such as this - and a s complicated an a issue as this is - that one can understand every thing that this entails. It is my hope that all of the legalities concerning this proposed reactivation are thoroughly investigated - How can a public linear park be taken back for transportation of trash and How can the Gorton Area which is "forested" be used for a transfer station for a private parties' industrial use?

4. What additional comments about the proposed rail reactivation would you like to add?

What compensations will be made to Headwaters Charitable Trust for the monies that have already been spent to renovate the trail - i.e. the 2 bridges that were rebuilt, the Peale Tunnel, the work the Snow Shoe Rails to Trails have put into the 9.3 miles in question.

- We need to know where the siding will be located - and we need a Saturday public meeting - or meetings - for the working man to attend and ask more of these questions.
